

NORTHSIDE VISION

CONTACT LENS AGREEMENT

Northside Vision wants you to have a healthy, enjoyable contact lens experience. Since contact lenses are prescription medical devices worn directly on the front surface of your eyes, those who wish to wear contact lenses require additional services specific to contact lens wear – Services which are not part of regular vision exam. Your contact lens evaluation fee covers your initial evaluation today and any doctor recommended contact lens progress visits for up to 60 days. The contact lens evaluation fee varies depending on the time taken to fit you and the complexity of your prescription.

- Payment of the evaluation fee is due at the time of service unless we are to bill your insurance for these services. You are responsible for fees not covered by your insurance.
- We require half down to order contact lens and they must be paid in full before they are dispensed.
- We are happy to provide a written copy of your contact lens prescription when: (a) Your final contact lens prescription has been determined by the doctor; (b) you do not have an eye health problem that makes contact lens wear inadvisable; and (c) all financial obligations to Northside Vision have been paid.

Please indicate below whether you would like contact lens services today.

YES: I would like contact lens services today.

Please bill to my insurance. I understand I am responsible for all charges not covered by my policy.

I will pay for these services today.

NO: I do not wish to receive contact lens services today.

For current CL wearers, this means no changes or renewals can be made to your prescription.
